

Dear Fourth Grade Parents, Guardians, and Students,

We hope this email finds you and your family healthy and safe. Our fourth-grade team would like all our students to know we miss them greatly. During this time, we want you to know we are thinking about you and your families. We would like you and our students to know during this time of uncertainty, we are doing everything we can to help ensure the well being of your student(s) and their academic needs.

Our team has come together to create a list of at-home resources to help you and your students continue working on their academic progress. The resources listed are all FREE and easily accessible to the students without requiring a log-in. The only resources that will require log-ins from students are the curriculum resources and Google Classroom. Each day, students will be able to find classroom work in their respective Google Classrooms.

We know this is an uncertain time and each family is managing it differently. These are just resources for your family. Our expectation is to help provide the best educational experience during this difficult time. Please know we understand each family will need to manage these resources differently. At this time, there will be no formal grading process for these assignments/resources. Please feel free to reach out to your fourth-grade teacher with any questions, clarifications, or concerns. We are here to support you the best we can during this time. Resources will be updated regularly. Please check back for updated links and information.

Sincerely,

Ms. Headley, Ms.Lopez, Ms. Sanchez, and Ms. Weibley
