

8th Grade News

Hello Parents,

The Third week of school is done and the initial NWEA test is now complete. There will be make up testing for the students that was absent. This week will be the first Student of the Month celebration in the Gym. Congratulation to all the students for through the first month of school. Now we are back in our daily routine, the teachers will be increasing the rigor and pacing for the students. If the students need help, have them reach out to that teacher. The teacher will make arrangements to assist the students upon request. We want to the student to advocate for themselves as they would in high school. We want all the students to succeed. Thank You.
